Website: aymen.benyedder.top

Web & Systems Engineer with 7+ years of experience in DevOps, Full-Stack Development, and IT Infrastructure. Proven track record in automating CI/CD pipelines, managing containerized environments (Docker/NGINX), and leading Agile projects. Expert at bridging the gap between development and stable, scalable operations.

SKILLS

Web Development: React, Node js, HTML, CSS, JavaScript.

Web CMS: Wordpress

Infrastructure & Server Management: Linux, NGINX, Apache, PM2, docker, Networking

CI/CD & GitOps: Git, GitHub Actions, ArgoCD, FluxCD

Database: MongoDB, PostgreSQL, MySQL

Monitoring & Security: Prometheus, Grafana, ELK, SSL/TLS, Fail2Ban

Automation & Scripting: Bash, PowerShell

Project Management: Agile, Scrum, Kanban, ClickUp

Languages: Arabic (Native), English (Advanced), French (Fluent)

EXPERIENCE

Alizeth, Mednine - DevOps & Project Manager - March 2023 - PRESENT

Orchestrated CI/CD pipelines using GitHub Actions and ArgoCD, reducing deployment errors and accelerating release cycles.

Managed containerized infrastructure via Docker and NGINX, ensuring 99.9% uptime for client applications.

Led Agile workflows and sprint planning using ClickUp to ensure on-time delivery of complex software projects.

DevCom, Medenine - Tech Support March 2021 - February 2023

Resolved high-priority technical issues and server bottlenecks, maintaining strict system reliability and performance.

Automated routine maintenance and system monitoring using Bash scripting, increasing operational efficiency.

CB Audit & Conseil, Tunis - IT Technician October 2016 - October 2020

Managed secure network infrastructure and workstation configurations for sensitive financial data environments.

Streamlined internal IT support processes, significantly reducing average ticket resolution time.

PROJECTS

Facturationtunisie.tn: full-stack Node/React app with Dockerized CI/CD pipelines, handling both development and DevOps automation (build, deploy, observability).

Eatorder: PM & DevOps for a restaurant platform; built deployment architecture using Docker & GitHub Actions.

Riskvision: Full-stack development and automated deployment of a safety platform using React and Node.js.

ComptaCRM: Developed a secure, tailored CRM for accounting firms with a focus on SSL/TLS security and data integrity.

EDUCATION

ISAMM, Mannouba - Master on Media's Engineering

Advanced multimedia technology training with practical media production.

ISAMM, Mannouba - Fundamental Bachelor's Degree in Computer Science

Extensive training in programming, algorithms, data structures, and software engineering.
